## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-6, drawn to a method for fabricating a capacitor of a semiconductor device, classified in class 438, subclass 3.
  - II. Claim 7, drawn to a capacitor of a semiconductor device, classified in class 257, subclass 68.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product invention II can be made by another and materially different process – for example: providing a temporary substrate; depositing a plate electrode on the temporary substrate; forming a dielectric film on the plate electrode wherein the dielectric film is formed by sputtering a second  $\text{Al}_2\text{O}_3$  film on the plate electrode, depositing a  $\text{Ta}_2\text{O}_5$  layer doped with Ti on the second  $\text{Al}_2\text{O}_3$  film, sputtering a first  $\text{Al}_2\text{O}_3$  film on the  $\text{Ta}_2\text{O}_5$  layer doped with Ti; forming a storage electrode using silicon on the dielectric film; and removing the temporary substrate.

Art Unit: 2813

2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Johnny Kumar on 08/30/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thanhha Pham whose telephone number is (571) 272-
